Serving Northern New Jersey since 1985, SMS Security Systems, LLC is a family-owned business headquartered in Caldwell. We specialize in system design, installation, superior service and monitoring of security and fire alarms for commercial business, property managers and municipalities. Our size enables us to provide a higher level of client service and attention to detail that the national companies cannot match.

As an authorized **Bosch Certified and GE Security Dealer**, SMS has been selectively chosen from hundreds of security installation firms for our attention to detail, clean installations and superior customer service and support.

SMS is a proud member of the New Jersey Burglar & Fire Alarm Association and our founder, Scott Stellfox, is a past board member. In addition, our installers and technicians have learned their craft through the Association's national training program and attend continuous in-house and manufacturers' training. A well-trained technician ensures you of the very best in trouble-free installation and service.

**COMMERCIAL
PROTECTION**

Video Surveillance • Access Control • Fire Alarm Systems • Security Systems • Service

Video Surveillance

The world's leading police organizations recognize that video surveillance is vital to deterring crimes and solving them. SMS Security Systems LLC offers video surveillance systems that go well beyond traditional security cameras and monitors. Our experts can install digital video recording equipment and provide remote access to your system from a PC anywhere in the world. This can include color dome cameras with pan and tilt controls, covert surveillance or other options. At SMS, we can custom design a scalable system to meet your needs and budget.

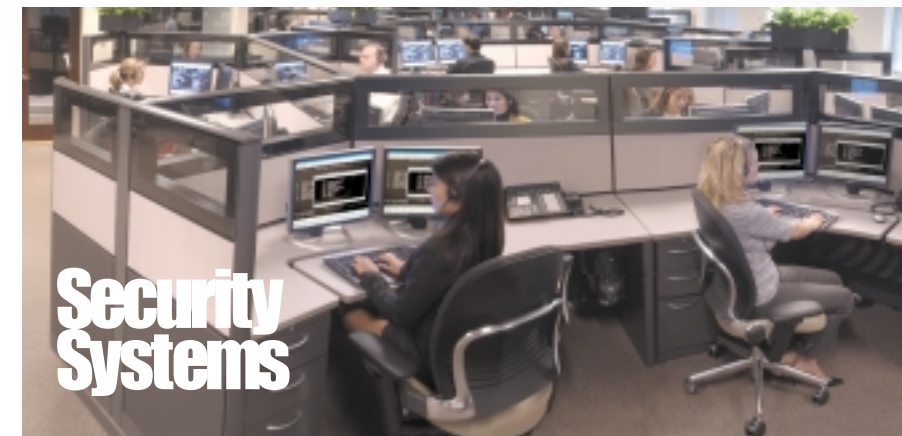

Access Control

To prevent unauthorized entry, SMS can install access control systems from basic standalone ones with a single door to networked systems spanning hundreds of miles as well as hundreds of doors. Your visitor management system can include options such as card access, photo badging and video integration.

Fire Alarm Systems

Fire codes have changed significantly over the years and so have fire alarm systems. As a Silent Knight dealer, with technicians and installers well versed in current fire codes, SMS is your source for the latest in fire alarm technology. We install conventional or advanced addressable systems which identify the specific location of the detector so you know instantly where the fire is endangering your business. SMS provides everything from manual pull stations to sophisticated smoke and heat detectors. You can look to our experts for design, installation and service. To maximize convenience and effectiveness, SMS also can provide an interface from your system to your HVAC, elevator recall, fire sprinkler monitoring and supervision. SMS handles the project from start to finish and also offer fire alarm inspections, service contracts and monitoring.

Security Systems

SMS customizes security systems to meet your specific needs in this fast changing world. We create hardwired and wireless solutions from the very best manufacturers in the industry, including Bosch and GE Security, to protect your office facilities, property, employees, documents and assets. SMS installs everything from basic detection coverage to advanced systems. Our experience runs the gamut from small business offices to large factories and even municipal water and sewer authorities.

Service

Uncompromising customer service is essential in security. Our size allows us to provide a higher level of customer service that national companies can't beat. SMS's fleet of fully equipped, radio-dispatched trucks service needs throughout Northern New Jersey 24 hours a day from our Caldwell headquarters. Ensuring trouble-free installation and the finest service are our crews of installers and service technicians whose skills are honed in the National Burglar and Fire Alarm Associations national training program as well as by continuous in-house and manufacturers' training.

Central station monitoring 24/7/365 is a crucial link in the security chain, and we partner with the best: Rapid Response Monitoring. Its 40,000 sq. ft. UL listed facility watches over all of our clients for a quick response to any emergency situation.
