

## Security Makes Sense

Feel secure in an insecure world with SMS' complete security and fire systems

SMS Security Systems, LLC provides sales, service, installation and monitoring from our headquarters in Caldwell to all of Northern New Jersey. Our company's size allows us to provide a higher level of customer service and attention to detail with every installation and service we provide. As our name states, SMS not only installs alarm systems but we are a complete low voltage integrator, addressing all aspects of our clients needs from **security and fire to whole house audio/video systems.**

We provide it all and each installation is backed by a full one year warranty. "Worry-free" service contracts are also available.

*Secure your home. Protect your family.*

## Security/ Fire

*SMS Security Systems, LLC. Provides a full range of custom security and fire alarm systems to meet each client's individual needs and their ever changing home environment.* Using hardwired or wireless equipment from the very best manufacturers in the industry,

we install everything from basic detection coverage to advanced systems. SMS is proud to be a Bosch certified dealer, as well as a GE security provider.

Our installers and service technicians are trained by the National Burglar and Fire Alarm Association's national training program, and they attend continuous in-house and manufacturer's training. A well-trained technician ensures each client the very best in trouble free installation and service.

## Whole House Audio

*Custom in-wall and in-ceiling speakers are a great addition to any home.*

We carry a full line of Jamo, Proficient Audio and Niles loud speakers from entry-level background speakers to high definition audiophile quality. Combined with the right AV components such as Denon, Pioneer or Harmon Kardon they make a great package. From a single pair of speakers to a multi-room

system with individual remote control touch panels, SMS can handle all of your audio/video needs.

## Camera Systems

*Video surveillance has come a long way in recent years.*

We provide a full line of indoor and outdoor low profile and covert camera systems to watch over your home and family. Check in on the kids from the office or view the perimeter of your home with your laptop computer from anywhere in the world. We have a package to meet your needs and budget.

## Personal Emergency Monitoring

*Designed for the elderly, shut-in's or people with medical conditions.*

In the event of an emergency, the user just pushes the large button on the console or the waterproof neck pendant or wristband. Our operations center will call the home, speak to the person through a speaker in the console. If help is needed we can dispatch the police, an ambulance or family members.

## Structured Cable Systems

*Future proof your home today with a structured cable system from SMS.*

Used in new construction and retrofit

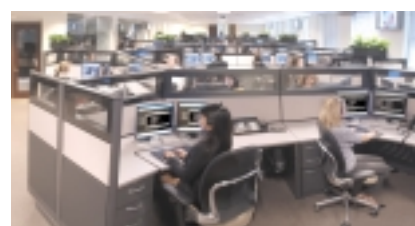

installations, structured cable systems or "Smart Home" integrate telephone, computer networking, cable TV and satellite into one cable. First

choose the locations such as bedrooms, kitchen, den etc. then we'll home run each cable back to a central point in the house such as a utility room or basement. Finally we'll connect them all in a cabinet called a "Hub." Since all components are combined in one unit for seamless integration and ease of use, it's a snap to add future services in your home without the need to run additional unsightly cables.

## Central Station Monitoring

*Central Station Monitoring 24/7/365*

is a crucial link in the security chain, and we partner with the best: *Rapid Response Monitoring.* It's a 40,000 sq. ft. UL listed facility watching over all of our clients for a quick response to any emergency situation.
